

Dear Council Member [Council Member's Last Name]

I am writing as a resident of Blaine to express my concern about the continued delays in approving permits for broadband construction within our community.

Reliable, high-speed internet is an essential service for families, students, remote workers, and local businesses. Many residents, including myself, want access to additional broadband choices and the benefits that come from competition among providers. When broadband deployment is delayed, residents lose opportunities for better service, improved reliability, and competitive pricing.

I respectfully urge the City Council to take action to approve the permits necessary for construction to resume. Residents should have the ability to choose the internet provider that best meets their needs, and unnecessary delays only postpone those benefits for our community.

Blaine has an opportunity to promote more broadband investment, greater consumer choice, and improved connectivity for residents and businesses. I encourage the Council to work cooperatively with all parties involved and move forward with permit approvals as quickly as possible.

Please make broadband expansion and consumer choice a priority and allow construction activities to continue.

Thank you for your consideration.

Sincerely,

[Resident Name]
